## Preface

This volume contains the proceedings of the lectures delivered at the conference, *Viscosity Solutions of Differential Equations and Related Topics*, held at the Research Institute for Mathematical Sciences, Kyoto University, during September, 17-19, 2002. All the papers are concerned with recent developments in the theory of viscosity solutions and related topics in differential equations.

The conference was possible to be held by support from the Research Institute for Mathematical Sciences. Also, financial support from the Japan Society for the Promotion of Science through its Grants-in-Aids for Scientific Research was helpful for making the conference successful. We wish to thank the Research Institute for Mathematical Sciences and the Japan Society for the Promotion for their support and all those who cooperated to publish this volume.
